PROJECTS

AICTE App   Aug 2022
- Developed a user friendly application
- Formulate and design innovative user interface for AICTE Dashboard and App

Medical App   Oct 2022
- Develop a medical based application
- Using Cloud computing, we maintain the user's and doctor's records and necessary information
- Offers firebase protection for security

Online blood bank system   Feb 2022
- Using cloud computing, we will create a central repository for numerous blood deposits, including blood details and depositor information.
- The blood details would include blood type, storage area, and storage date to help maintain and monitor the blood depositors.
- Cloud-based system would allow for greater transparency in determining the availability of the desired blood depositor.

WORK EXPERIENCE
